## Professional Summary

Dedicated and results-driven **QA Engineer** with over **3+ years** of experience designing and implementing robust testing strategies for software development projects. Proficient in creating and executing comprehensive test plans, test cases, and test scripts, with a strong background in various testing methodologies, including Smoke Testing, Sanity Testing, Regression Testing, and Retesting. Experienced in utilizing bug tracking tools such as **JIRA** and managing the bug life cycle within Agile environments. Skilled in automation testing with **Selenium** and **Java**, complemented by a solid understanding of **Core Java**. I was seeking a challenging position where I could leverage my testing expertise and commitment to quality to contribute to the success of innovative software projects.

## Technical Skills

**Testing Tools & Frameworks** – Selenium WebDriver, TestNG, Cucumber

**Programming Languages** – Core Java

**Version Control** – Git & GitHub

**Test Management Tools** – JIRA

**Agile Methodologies**

## Education

ANDHRA UNIVERSITY | B. Tech (Electrical and Electronics Engineering)

## Professional Experience: -

**RESOURCE SOFTECH LIMITED**, Hyderabad | Automation Tester | **September 2022**– Present

Project: Eshop

Project Description: eCommerce Automation Testing

Overview: As an Automation Tester on the eCommerce project, I contributed to ensuring the quality and performance of an online retail platform that supports thousands of users daily. The platform includes features such as product search, user accounts, payment processing, and order management.

### Responsibilities:

- Using tools such as Selenium, TestNG, and Java, and Developing reusable test scripts to enhance testing efficiency and reduce redundancy in testing efforts for a high-traffic online retail platform.
- Executed automated test scripts for functional and regression testing of core eCommerce functionalities, including product search, checkout process, and payment gateways.
- Analyzed test results, reported defects, and collaborated with development teams for timely resolution while effectively reporting and tracking defects.

- Maintained clear and detailed test documentation, including test cases, test scripts, and test execution reports. Provided regular updates to stakeholders on testing progress, defect status, and overall quality metrics Maintained detailed documentation ensuring clarity and transparency in testing processes.

**RESOURCE SOFTECH LIMITED, Hyderabad | Manual Tester | August,2021-September,2022**

**Project: MedAppoint**

Description: Med-Appoint is a Health Care application. It helps Hospitals and Patients to request an appointment booking with a doctor online. This Project can also help Doctors manage the schedules of their appointments with their patients. This Doctor appointment system will organize the schedules which will be submitted as a request to the doctor they have selected.

**Roles and Responsibilities:**

- Preparing test Cases and testing scenarios.
- Checking the application behavior.
- Executing test cases manually and preparing daily execution reports.
- Use of the Defect and Test Management tool to log the defect and test result. Reviewing of test cases prepared by peers.
- Providing adequate support to the developers for defect analysis.
- Sending project daily status reports.
- Performed Functional, Integration, Regression, Negative and System Testing.
- Functional, System, and Regression testing for Every iteration and delivering to onsite.
