## INTERNSHIP

Nov 2023- Present

Ramana Soft

### QA Manual Tester

During my internship at Ramana Soft, I had the opportunity to work as a Manual Tester on an E-learning application. My responsibilities included:

- Test Case Development: Created comprehensive test cases to ensure the thorough coverage of the E-learning application's functionalities.
- Test Execution: Conducted manual testing to identify and report software defects, ensuring the application's reliability and user-friendliness.
- Regression Testing: Performed regular regression testing to verify that new updates and features did not adversely affect existing functionalities.
- Defect Reporting: Logged and communicated software defects to the development team, providing detailed information for effective issue resolution.
- Documentation: Maintained detailed test documentation, including test plans, test cases, and testing reports to facilitate knowledge sharing and future reference.
