PROFILE SUMMARY

A motivated and enthusiastic Fresher with a solid foundation in front-end web development technologies, including HTML, CSS, Bootstrap, JavaScript, and React.js. Passionate about crafting intuitive and responsive user interfaces, with a strong commitment to learning and applying modern web development practices. Eager to contribute to innovative projects and collaborate with a dynamic team to develop impactful and visually appealing digital experiences.

PROJECTS

Portfolio Website:

- Developed a responsive personal portfolio website using React.js to showcase skills and projects, with dynamic components for a seamless user experience.
- Implemented smooth scrolling, sticky navigation and CSS animations to enhance interactivity and visual appeal.
- Created modular sections for About, Skills, Projects and contact, including a fully functional contact form with form validation.

NEWS APP:

- Developed a responsive News App using React.js, Bootstrap and JavaScript to display real-time news across multiple categories by interacting the News API.
- Implemented category-based filtering using React Context-API, allowing users to view news in categories like Business, Health and Technology.
- Utilized Axios for efficient API request, dynamically fetching and updating news articles based on user selection
- Enhanced user experience with fallback images for articles without media and a Read More button linking to full articles, ensuring comprehensive news coverage.
